Message from Management

Anhui Delfund Industrial Group Co., Ltd. is a reputable, industry-leading export-oriented enterprise with years of deep-rooted experience in import-export trade and industrial innovation. We believe that long-term business success cannot be separated from responsible, sustainable development. As an outward-facing industrial group connecting domestic manufacturing with global markets, we integrate sustainability into every link: product innovation, global trading operations, supply-chain collaboration, workplace management and environmental stewardship. We pursue balanced growth among economic returns, environmental protection and social welfare. This report documents our practices, progress and existing gaps. We will continue to deliver reliable, responsible products and services to global clients while creating shared value for all stakeholders.

Sincerely,

Management Team

Anhui Delfund Industrial Group Co., Ltd.

About This Report

01 / REPORTING ENTITY

Anhui Delfund Industrial Group Co., Ltd. (the "Group"), a comprehensive industrial conglomerate engaged in manufacturing, international trade, and related services.

02 / REPORTING PERIOD

January 1, 2025 to December 31, 2025. Prior-year operational data (2024) is included for comparative analysis and contextual reference where relevant.

03 / REPORT SCOPE

Covers the Group’s core industrial operations, global import-export business segments, internal management systems, and key direct suppliers within the primary supply chain.

04 / REPORTING REFERENCE

Prepared in alignment with GRI Sustainability Reporting Standards (Core Option) and aligned with UN Sustainable Development Goals (SDGs). This is a self-declared publication without third-party assurance.

For enquiries regarding this report, please contact the company administrative department.

Company Profile

Anhui Delfund Industrial Group Co., Ltd. is a well-reputed, industry-leading outward-oriented enterprise headquartered in Anhui, China. We have long been engaged in import-export business and industrial-driven innovation. Core business scope covers international trade, industrial product development, cross-border supply-chain services and industrial project operation. With years of market accumulation, our products and services reach multiple overseas markets.

We adhere to quality-oriented operation and maintain stable cooperative relationships with global customers and domestic suppliers, aiming to create mutual value and sustainable growth.

01 Export-Oriented

Connecting domestic manufacturing excellence with global markets, facilitating seamless cross-border trade and distribution networks across Asia, Europe, and the Americas.

02 Industrial Innovation

Driving product and service upgrading through continuous R&D investment, integrating advanced technologies to enhance product competitiveness and meet evolving market demands.

03 Sustainable Value

Committed to balancing economic prosperity with environmental protection and social responsibility, fostering long-term partnerships and contributing to a greener future.

Our Sustainability Strategy

"To become a responsible global industrial and trading partner that achieves coordinated progress of economy, environment and society."

Green Operation

Promote resource efficiency, reduce operational environmental impact, and drive green upgrades across the entire import-export value chain to minimize ecological footprints.

Responsible People Practice

Protect employee rights and interests, build safe, healthy and inclusive workplaces, and foster a culture of continuous learning to encourage talent growth and well-being.

Ethical Global Business

Conduct compliant and fair international trade, enhance supply-chain sustainability performance, and uphold international norms to build trust with partners worldwide.

Strategy & UN SDG Alignment

Sustainability-related matters are reviewed by senior management, and relevant requirements are passed down to trading, operation, procurement and administrative departments for implementation. This ensures that sustainability goals are integrated into daily operations and decision-making processes across all functional areas.

Senior Management: Strategic Oversight & Sustainability Review

Trading	Operations	Procurement	Admin
Market Responsibility	Efficient Execution	Sustainable Sourcing	Policy Compliance

Aligned UN SDGs

01

SDG 8: Decent Work

Promoting inclusive economic growth, full employment and decent work for all employees and partners.

02

SDG 9: Industry & Innovation

Investing in resilient infrastructure, fostering technological innovation and sustainable industrial practices.

03

SDG 12: Responsible Consumption

Implementing sustainable consumption and production patterns to minimize environmental impact.

04

SDG 17: Partnerships

Strengthening global partnerships to achieve common sustainability goals and shared prosperity.

Environmental Performance

Energy & Carbon Management

As an import-export-focused industrial enterprise, our environmental impacts stem from office operations, project-related activities, product sourcing, packaging, and cross-border logistics. We actively promote energy-saving initiatives across office and on-site facilities by deploying high-efficiency equipment, implementing rational electricity use protocols, and eliminating idle energy consumption. In cross-border logistics, we prioritize optimized transportation solutions to reduce indirect carbon emissions associated with export shipments. We are continuously collecting baseline data to establish a solid foundation for setting future carbon-intensity improvement targets and driving sustainable operational practices.

Office Energy Saving

Adopt energy-efficient devices and strict power management to cut down idle consumption in daily operations.

Logistics Optimization

Optimize transportation routes and carrier selection to minimize the carbon footprint of cross-border shipments.

Carbon Data Collection

Systematically track emissions data to establish baselines and set measurable reduction targets.

Environmental Performance

Waste, Packaging, Water & Compliance

01. Waste & Packaging Optimization

Advocate simplified packaging and use of eco-friendly materials; implement strict waste sorting protocols across all offices; actively promote paperless operations to minimize resource consumption and waste generation.

02. Water Resource Stewardship

Strictly adhere to local water-use regulations and discharge standards; deploy daily water-saving management practices; conduct regular consumption audits to identify inefficiencies and reduce environmental impact.

03. Regulatory & Environmental Compliance

All facilities operate in full compliance with national and local environmental laws; conduct regular internal awareness training and third-party audits to ensure adherence and foster a culture of environmental responsibility.

04. Hazardous Waste Management

Hazardous waste is managed per strict local regulations; certified vendors handle collection, storage, and disposal to prevent environmental contamination and ensure workplace safety standards are met.

Social Performance

Employee Care & Occupational Health

Employee Care & Decent Work

We respect legitimate rights of all staff, implement standardized employment contracts, social-benefit arrangements and working-hour rules in compliance with Chinese labour laws. We offer internal training covering professional skills, foreign-trade expertise, compliance and occupational health. We promote workplace equality and oppose any form of discrimination.

Occupational Health & Safety

Safety awareness runs through industrial activities and business trips. We conduct risk reminders for field assignments and establish proper emergency response mechanisms. No major work-related safety accidents occurred during the reporting period.

Social Performance

Community Contribution & Customer Responsibility

Community Contribution

As a local enterprise rooted in Anhui province, we maintain positive interaction with local communities. We support public-welfare activities within our capacity, pay taxes in accordance with law, and create stable local employment opportunities to drive regional economic prosperity and social harmony.

Customer Responsibility

For global import-export clients, we focus on superior product quality, transparent communication, and reliable after-sales service. We actively listen to customer feedback to optimize solutions, strictly adhere to international trade standards, and respect overseas market regulatory requirements to build sustainable, trustworthy partnerships.

Governance & Ethical Business

Corporate Governance

Senior management oversees major decisions; internal controls cover finance, procurement, trade compliance and risk prevention.

Integrity & Anti-Corruption

Zero tolerance for bribery and commercial corruption; strict code-of-conduct requirements in domestic and overseas dealings; regular integrity awareness training.

International Trade Compliance

Strictly observe customs regulations, import-export control rules, and foreign-exchange requirements; continuous compliance training for international staff.

Data & Information Security

Protect business data, customer and employee personal information; establish internal rules to prevent leakage and ensure compliance with global privacy standards.

Responsible Global Supply Chain

Our sustainability performance is closely connected with our whole value chain. We extend sustainability expectations to domestic suppliers and overseas partners, embedding ethical standards and environmental responsibility into every collaborative relationship.

01 Supplier Selection

Rigorous screening criteria focusing on product quality, cost efficiency, and strict adherence to international labor laws and environmental protection regulations.

02 Responsible Expectations

Proactively communicate green production guidelines, enforce ethical labor norms, and provide training to align partners with our sustainability goals.

03 Green Upgrading

Drive gradual eco-design improvements for export goods, transition to recyclable packaging, and reduce carbon footprint across the production process.

04 Win-Win Partnership

Uphold fair trade principles, share growth opportunities, and foster long-term, mutually beneficial collaboration for sustainable prosperity.

"By integrating sustainability into every link of the supply chain, we create shared value that benefits our business, partners, and the planet."

Sustainability Goals & Future Roadmap

Short-term (1-2 years)

- Further popularise paperless office practices and optimise eco-friendly packaging for export orders to minimise waste and reduce carbon footprint.
- Expand sustainability and compliance training for import-export and procurement teams to embed ethical and green practices.
- Strengthen supply-chain communication to cascade responsible-business requirements to more key suppliers systematically.
- Establish robust internal data collection for environmental metrics (energy, water) to enable accurate carbon footprint tracking.

Medium-term (3-5 years)

- Integrate low-carbon logistics and sustainable sourcing strategies, actively exploring renewable energy adoption and circular economy models to reduce operational emissions.
- Enrich employee development systems with a focus on holistic wellbeing, fostering a diverse and inclusive culture to boost talent retention and engagement.
- Deepen responsible supply-chain partnerships by co-creating sustainability goals, conducting regular audits, and supporting supplier capacity building.

We will adjust specific measures according to business development, market changes and regulatory updates to ensure alignment with global sustainability standards.

Stakeholder Engagement

01 Employees

Regular staff meetings, professional internal training programs, and open suggestion collection channels to foster a collaborative and informed workforce.

02 Customers (Global)

Proactive business communication, regular satisfaction surveys, and a dedicated after-sales feedback loop to ensure alignment with market needs.

03 Suppliers

Periodic supplier conferences, transparent procurement communication, and strategic dialogues to build resilient and sustainable partnerships.

04 Government & Regulators

Committed to strict law-abiding operations, proactive responses to regulatory supervision, and full compliance with industry policies.

05 Local Communities

Active participation in local socio-economic development, investment in public welfare projects, and fostering positive community relationships.

Thank You

Anhui Delfund Industrial Group Co., Ltd.

Sustainability Report 2025 | Reporting Period: Jan 1 – Dec 31, 2025

This report contains qualitative descriptions of corporate sustainable-development practice. Detailed quantitative data will be gradually supplemented as our internal statistics system matures. This document is a corporate-drafted sustainability report for business-presentation purpose and is not third-party audited.
